

Sweet Home Bearolina

Light the Firepit

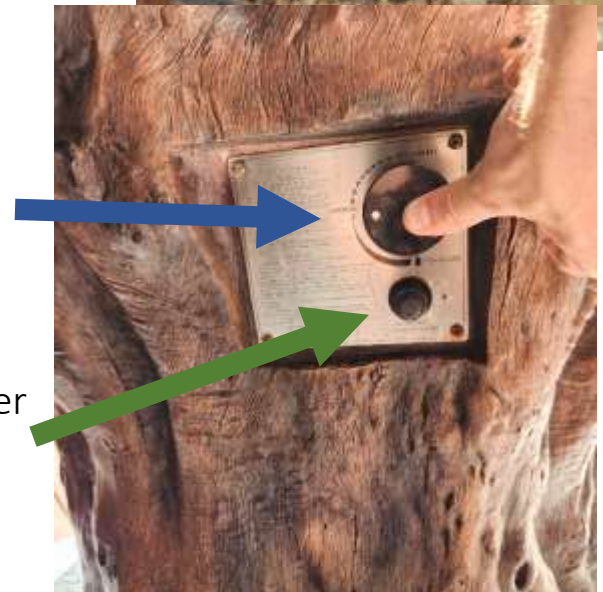

Remove panel to access inner controls for firepit

1. Make sure the yellow valve is open (“in-line” with the pipe)
2. Turn the timer valve to open the propane to the unit

On the Outer Controls

3. Turn the propane to light, and press in on knob
4. While holding knob depressed, push lighter button
5. Twist to set flame level

Enjoy!

Remember, no smores on propane fire to keep it functioning properly and not attract wildlife.
